

Syllabus

Fall semester 2025

Course Title	Biology & Experiment II	Course Code		CB1211		Credit	3	Classroom	Tam 206 (Tam 207 for lab)
		Type		Core Course		Hours	3		
Teacher	Name	Class no.	Office	Office hours	Contact		E-mail		
	Park, Ki Youb	1	Tamgu 203	Mon 5, Tues 7, Fri 8	051-606-2225		kiyoub@gmail.com		

1. Course Description

- Understand the main topics of evolution and animal physiology at high school level.
- Learn skills and abilities including research and communication skills.
- Develop scientific curiosity and analytical/logical thinking skills.
- Apply scientific knowledge to solve real-life problems.

2. Core Target Competencies

Subject Core Competencies			
1. Analyzing & Interpreting Scientific Data	2. Understanding Graphical Models	3. Visual & Digital Communication	4. Effective Team Contribution
1. I can analyze scientific data using appropriate tools and methods, interpreting results to draw evidence-based conclusions. 2. I can understand the details of given graphical figures, schemes, tables, and models as well as what they represent. 3. I can design and utilize effective visual aids and digital tools to enhance my communication and present information clearly. 4. I can actively and equitably contribute to team efforts, sharing responsibilities and working constructively towards shared objectives.			

3. Textbooks and References

Textbook: Campbell Essential Biology with Physiology (Global Edition, 6th Ed.) Simon, Dickey, Reece (Pearson)

4. Class Method

Lecture / Individual or Group Worksheet / Group presentation / Laboratory / Homework

5. Evaluation

A. Evaluation Criteria

Mid-term Exam ¹	Final Exam ¹	Homework ²	Lab ³	Class activity ⁴	Attendance & Attitude ⁵	Total ⁶
25	25	10	15	15	10	100%

B. Evaluation Method

- (1) For exams, multiple-choice, fill-in-the-blank, short answer, and/or essay tests.
- (2) Pre-lab report (5%) and chapter homework (5%): Late submission will deduct points, and no submission will result in 0 point.
- (3) Lab activity (5%): Active participation and cooperation with teammates will be evaluated.
Post-lab report (10%): A worksheet will be given in each lab. No submission will result in 0 point. **DO NOT COPY** your team member's report.
- (4) Class activity: worksheet (5%, if incomplete: 3~4 points, no submission: 0 point), individual/group presentation (10%)
- (5) Attendance and attitude: -1% for each absence, -0.5% for being late and sleeping, etc.
- (6) **Pass: total 80% or better.** (To pass: If you have perfect scores for 2~5, you should have min. 120 points out of total 200 points from both exams.)

6. Criteria for Awarding Credits

☞ Students with excellent academic achievement are recommended for the Academic Excellence Award, and their performances and competencies are recorded in the Subject Details. However, students with poor academic attitude or low attendance are excluded.

● Attendance for at least three-quarters of the total class hours is required to earn credit.

● For an exam missed due to an excused absence with the principal's permission or a medical absence, the score is calculated by multiplying the percentile score of the other exam (either midterm exam or final exam of this subject) by a factor of 100% for excused absence (※) and 80% for medical absence (※).

● If both exams are missed due to excused absence with the principal's permission (※) or medical absence (※), separate exams may be provided with permission by department and this incidence will be reported to the school curriculum committee.

※ Refer to the "Academic Performance Management Regulations" for detailed information.

7. Weekly Plans

Week (period)	Topic and Contents	Class activity (Notes)
Week 1 8.18.~8.22.	Introduction to the course Ch13. How Populations Evolve	
Core Competencies	♦ 2. Understanding Graphical Models	
Week 2 8.25.~8.29.	Ch13. How Populations Evolve	
Core Competencies	♦ 2. Understanding Graphical Models	
Week 3 9.1.~9.5.	Ch21. Unifying Concepts of Animal Structure and Function	Lab1. Microscopic observation of animal tissues
Core Competencies	♦ 4. Effective Team Contribution	
Week 4 9.8.~9.12.	Ch22. Nutrition and Digestion	Lab2. Digestive enzyme - -Observation of digestive organ model
Core Competencies	♦ 4. Effective Team Contribution	
Week 5 9.15.~9.19.	Ch22. Nutrition and Digestion	<i>Research about diseases related to Ch22</i>
Core Competencies	♦ 4. Effective Team Contribution	
Week 6 9.22.~9.26.	Ch23. Circulation and Respiration	<i>Group Presentation I</i>
Core Competencies	♦ 3. Visual & Digital Communication	
Week 7 9.29.~10.3.	Ch23. Circulation and Respiration	Lab3. Hematocrit measurement & Blood cell observation - Observation of heart model
Core Competencies	♦ 1. Analyzing & Interpreting Scientific Data	
Week 8 10.6.~10.10.	Chuseok Holiday, Hangeul Day, Discretionary Holiday	No classes
Week 9 10.13.~10.17.	Midterm Exams (10.13.~10.16.)	10.17. Regular classes

Week 10 10.20.~10.24.	Ch24. The Body's Defenses	
Core Competencies	♦ 2. Understanding Graphical Models	
Week 11 10.27.~10.31.	Ch24. The Body's Defenses	<i>Research about infectious disease and vaccine</i>
Core Competencies	♦ 4. Effective Team Contribution	
Week 12 11.3.~11.7.	Ch25. Hormones	<i>Group Presentation II</i>
Core Competencies	♦ 3. Visual & Digital Communication	
Week 13 11.10.~11.14.	Ch25. Hormones	<i>Research about specific hormone</i>
Core Competencies	♦ 3. Visual & Digital Communication	<i>Individual Presentation</i>
Week 14 11.17.~11.21.	Ch27. Nervous, Sensory, and Locomotor Systems	Lab4. Effect of neurotransmitter on Daphnia heart rate
Core Competencies	♦ 1. Analyzing & Interpreting Scientific Data	
Week 15 11.24.~11.28.	Ch27. Nervous, Sensory, and Locomotor Systems	- Observation of brain model
Core Competencies	♦ 2. Understanding Graphical Models	
Week 16 12.1.~12.5.	Chapter Review	Make-up class week
Week 17 12.8.~12.12.	Final Exams (12.08.~12.12.)	

※ The above plans may change according to the academic schedule.
