1. Course Overview

This course explores the intersection of art, design, history, and technology. We believe abilities can be developed through dedication and a growth mindset. The KSA Art & Design encourages a wide range of skills, fosters aesthetic awareness, and enhances knowledge and critical understanding of art and design. It provides learners with opportunities to develop various skills, emphasizing personal and independent perspectives at all times. The lecture content appeals to KSA learners who wish to explore practical studio work through a range of two- and three-dimensional processes. It also incorporates new media and technologies alongside traditional media and techniques. Evaluation is based on the creative process throughout the year(30%) and creative outcomes that the culminating year-end exhibition(70%). The exhibition showcases how each student applied media and techniques, as well as the talents they developed over the year.

2. Course Objectives

The following list includes specific objectives of the course:

- Stimulate curiosity and imagination: Inspire learners to approach scientific inquiry with a sense of wonder and curiosity, encouraging them to explore alternative perspectives and push the boundaries of conventional thinking.
- Encourage experimentation and risk-taking: Create a supportive environment where learners feel empowered to take creative risks and explore new ideas, recognizing that failure is an integral part of the learning process.
- Promote collaboration and teamwork: Facilitate collaborative projects that encourage learners to work together towards common goals, fostering communication, empathy, and mutual respect.

3. Core Competencies

KSA ART Core Competencies				
Creativity	Critical Thinking	Communication	Empathy	Team Leadership
–Creativity in art and design is the ability to generate original ideas, concepts, and solutions that are both innovative and meaningful. It involves thinking outside the box, exploring unconventional approaches, and pushing the boundaries of traditional norms and conventions. Creativity in art and design encompasses a wide range of activities, including brainstorming, experimentation, problem-solving, and envisioning possibilities. – Communication skills in art and design involve the ability to effectively convey ideas, concepts, and messages through visual means, verbal explanation, or written documentation. It is about being able to articulate the inspiration, intention, and process behind your creative work to others, whether they are colleagues, clients, or the general audience. – Empathy is crucial in art and design because it allows artists and designers to connect with their audience on a deeper level by understanding their perspectives, emotions, and needs. By putting themselves in the shoes of others, artists and designers can create works that resonate with people on a personal or emotional level, eliciting empathy and fostering a sense of understanding and connection. – Team leadership in art and design, effective team leadership plays a crucial role in bringing together diverse talents and perspectives to achieve outstanding results. As a leader, it's essential to foster an environment of collaboration and creativity while also providing clear direction and guidance. One key aspect is understanding each team member's strengths and weaknesses, and delegating tasks accordingly to optimize productivity and motivation.
